Facilitation Tips

Open the room early

Arrive 15 minutes before the session. Ensure the presentation is loaded, workbooks are distributed, and the room is arranged for interaction.

Set psychological safety

Open with a clear statement that all contributions are valued. Model vulnerability by sharing a brief personal reflection on the topic.

Manage energy

Watch for energy dips around the 40-minute mark. Use a brief movement break, pair activity, or change of pace to re-engage the room.

Handle quiet participants

Use structured turn-taking (round-robin) for key reflection questions to ensure all voices are heard, not just the most confident.

Manage dominant voices

Use the phrase 'That's a great perspective — who else has a different experience?' to create space for other viewpoints.

Stay on time

Use a visible timer. If discussion extends, defer additional questions to the AI Prompt Pack for post-session reflection.

Capture key insights

Photograph any whiteboard content. Share a summary with participants within 24 hours to reinforce learning.
